## SUMMARY

A Frontend Developer with 3.3 years of working experience at Mphasis (Dec 2021 - Feb 2025), specializing in ReactJS, JavaScript, HTML, and CSS. Skilled in creating responsive, user-friendly web applications, optimizing performance, and collaborating in Agile teams to deliver high-quality solutions. Open to new opportunities as a Frontend Developer to create impactful digital experiences.

## SKILLS

**Primary Skills:** ReactJS, HTML, CSS, JavaScript, Python, MySQL, Bootstrap, Tailwind CSS, Redux Toolkit, NPM

**Version Control:** Git, GitHub, Bitbucket

**Development Tools:** Visual Studio, Eclipse, JIRA, Confluence, Artifactory, Jenkins, Figma, Parcel

**Soft Skills:** Communication Skills, Responsibility, Teamwork, Decision-making, Time management, Leadership

**Others:** Excel, Google Sheets, Ms Word, PowerPoint

## EXPERIENCE

### Software Engineer

Dec '21 — Feb '25

Mphasis LTD.

Pune (Remote)

- Led the frontend migration of a large-scale enterprise application from Angular to ReactJS within a tight 25-days deadline, collaborating with a team of 8 members, served as the primary frontend developer.
- Delivered 5+ production-ready applications, enhancing performance by 30% through clean, optimized ReactJS, JavaScript, HTML, and CSS implementations, while integrating SQL-based components for dynamic data rendering.
- Collaborated with 30+ cross-functional team members in Agile sprints, achieving a 15% faster feature delivery rate and ensuring smooth project execution; also utilized Excel for sprint tracking and effort estimation.
- Resolved 150+ frontend issues/bugs via JIRA, contributing to a 20% rise in client satisfaction, as acknowledged in regular stakeholder reviews; performed backend data validations using SQL queries.
- Received 6 individual awards (Kudos) and 2 team awards (Synergic Workforce) for excellence in delivery, collaboration, and technical execution, praised directly by Delivery Manager and Client.

## PROJECTS

### Schneider\_E2e\_AMS\_Project (4 Applications), Mphasis Ltd.

Dec '21 — Feb '25

- Ecommerce Project fulfilling many business requirements through electrical equipment and products.
  - Integrated backend APIs to fetch and manipulate frontend data.
  - Implemented filters and pagination for optimized data loading.
  - Involved in development, defect fixing, and unit testing.
  - Client Communication and KT for new team members.

### One Licensing Maintenance (1 Application), Mphasis Ltd.

Jan '24 — Mar '24

- License management e-commerce platform with self-service portal.
  - Enhanced website security by implementing Content Security Policy (CSP) headers.
  - Created concise project documentation using Confluence, Jira, MS Word, and Excel.
  - Collaborated in internal and external discussions to gather and finalize requirements.

### Recipes Radar | React Project [Link](#)

Feb '24 — Apr '24

- Recipe search application with filters, built using React.
  - Consumed dummy JSON API for fetching recipe data.
  - Used react-router-dom, react-icons, and Tailwind CSS for navigation, icons, and improved UI.

### Personal Portfolio | React Project [Link](#)

Aug '24 — Present

- Personal portfolio website built with React.
  - Showcases professional details, skills, and projects in an interactive way.
  - Continuously adding new features and improvements to enhance functionality and UI.
